For over 40 years, we have been manufacturing sustainable, engineered plastic safety products that are load rated, washable and ergonomically designed. Trusted by industry leaders worldwide to help keep their workforce safe when stabilization of machinery or equipment is required. Call us to see how we can help.

MADE IN **US**★

# STABILIZATION PRODUCT SOLUTIONS FOR WORKFORCE SAFETY

## Heavy Duty - Dura Crib Brand Stabilization Blocks (see our safety catalog for our other sizes)

**FULL SLAB**  
Mfg. Part # S612-24

- Dimensions: 6"x12"x24"
- A versatile heavy-duty recycled plastic cribbing block designed for rapid stacking of larger surface areas, such as heavy equipment repairs
- Made from recycled plastic
- Working Load: 110,000kg/242,508lbs

**BLACK DIAMOND CRIB**  
Mfg. Part # 67HDC-30

- Dimensions: 6"x7"x30"
- Features interlocking pyramid design on all four sides. Extra length makes this the ideal crib for creating a solid base for a crib stack
- Made from recycled plastic
- Working Load: 71,600kg/157,850lbs

**PRIME CRIB**  
Mfg. Part # 67PC-24

- Dimensions: 6"x7"x24"
- Our most popular heavy-duty recycled plastic cribbing block.
- Features two interlocking designs: Locking "Lincoln log" style sides and pyramid design sides which allow for additional stability and multiple stacking configurations
- Made from recycled plastic
- Working Load: 58,000kg/129,631lbs

## High Impact Plastic Protection Pads for Crib Stacks

Pads distribute weight over a crib stack to help reduce risk of point source load failure.

**SLAB PAD**  
Mfg. Part # SP24

- Dimensions: 2"x12"x24"
- Use with a single wide configuration of the Full Slab
- PSI: 3,000

**SLAB PAD TWO**  
Mfg. Part # SP24-2

- Dimensions: 2"x12"x24"
- Use with a double wide configuration of the Full Slab
- PSI: 3,000

**PRIME CRIB PAD**  
Mfg. Part# PCP242

- Dimensions: 2" x 24" x 24"
- Stabilizing plate created for use on a Prime Crib stack
- PSI: 3,000

Helps to Prevent Slips, Trips and Falls

## Turtle Tile Modular Matting

The Turtle Tile is the original interlocking cushion tile made from recycled, odor free plastic. Our tiles are ergonomic and make for versatile and comfortable safety mats in locker rooms, repairs shops or as manufacturing flooring.

- Dimensions: 12"x12"x (3/4" or 1/2" or 1")
- Easy to assemble, two-tab interlocking design
- 15 colors; available with specialized safety coatings and durometers
- Washable, and odor free.
- Matching interlocking safety ramps available

**Turtle Tile with Ramps**  
Mfg. Part: shown:  
Tile: TT1212  
Ramp: AF, MF

Use as Truck Compartment Liners to Protect Equipment

Turtle Tiles are versatile - they can be used to line truck compartments to protect valuable tools and equipment from rolling and provide for extra drainage to keep cabinets dry.

**Standard Hose Bridge Set**  
Mfg. Part # HBS

- Creates a temporary safe passage for driving over hoses
- For utilities (water, electrical, phone), in-plant use (welding cables, electrical conduit, water, steam, hydraulic, air lines), construction sites and municipal sidewalk repair
- Openings: accepts 5", 4" and 3" O.D.
- Low angle profile
- Supports up to 14,000 lbs. per axle.
- Easy to assemble
- Patented design (U.S. Pat. No. D552,217)

## Loading Rizers

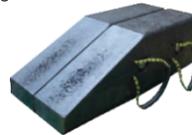

Indispensable ramp safety products made from recycled plastic for track vehicles, forklifts, lo-boys, auto transport or vehicle inspection.

- Inexpensive and versatile repair tool for indoor/outdoor use
- Choose from over a dozen sizes
- Lighter weight than steel ramps
- Customizable options include angle of rizer, lanyards, and slip-resistant bottoms and ramps

Mfg. Part #RZBF-1

Mfg. Part #RZ68-1

**Forklift Repair Kit**  
Mfg. Part #: IBSR

*The first choice tool kit of leading forklift manufacturers for their service technicians when stabilizing masts and machine during maintenance or repair.*
