About

For over 40 years, Turtle Plastics® has been manufacturing engineered safety and stabilization products **made in the USA from 100% recycled plastic**. Trusted by leaders in many industries, including aerospace, automotive, agriculture, heavy equipment, material handling, railroad, rescue, transportation, and utility to help keep their workforce safe, especially when stabilization of machinery or equipment is required. Turtle Plastics' brand of Dura Crib, Dura Stat, Dura Lumber and Turtle Tile are created with a reliable and repeatable formula, so each product performs in a superior manner, year over year. Please visit our website for more great products. We welcome your call to see how we, or one of our great industrial distribution partners can help.
