	CB	Carrying Bag	1
Weight (in lbs.)		559	

Working with leading instructors and heavy rig operators, we have assembled a complete kit to help with many functions performed by apparatus repair technicians/tow/rigging operators. This kit provides cribbing for maintenance of standard equipment found in your shops including forklifts, tugs and tow trucks. In addition, we have assembled larger Dura Crib blocks and pads when operators are in the field at accident scenes. We can customize components depending on your compartment or shop space.

Turtle Plastics is a proud member of these great organizations:
